Cyberster

LEGENDS LIVE FOREVER

A Legend Reimagined

For over 100 years MG has driven innovation and built products that excel in performance and offer remarkable value. And after a century of automotive excellence, we are thrilled to introduce the next advancement in our pursuit to give customers an unmatched driving experience.

Introducing the all-electric, ever-powerful, MG Cyberster. 100 Years in the making, the Cyberster marks a groundbreaking evolution for the MG brand fusing technology of the future with the legacy of past MG roadsters. Our history combined with our modern forward-thinking approach has delivered this bold, cutting edge electric sportscar, which offers unmatched performance. Cyberster promises to transcend every drive into an unforgettable journey.

Cyberster

A Timeless Design, A Contemporary Interpretation

Designed to defy the ordinary, MG Cyberster has its roots stemming from the ever successful MG roadsters of the early 60's to late 80's. At 4535mm long and 1913mm wide, Cyberster's striking silhouette and sleek curves captures the essence of legendary models like the MGA and MGB while embracing a bold, contemporary design. This perfect blend of classic inspiration and forward-thinking engineering makes the MG Cyberster not just a car, but a statement of style and performance for a new generation of drivers.

One of the most eye-catching features of the Cyberster is its electric scissor doors. These distinctive doors open upwards and can be controlled from both the remote or from buttons both on the door and within the cabin.

The Cyberster boasts classic roadster proportions that allow for an ultra-thin battery pack and compact suspension systems, bringing the spirit of a traditional roadster into the electric era. Its distinctive 'Wind Hunter' front design efficiently channels airflow, ensuring the Cyberster stays cool even under intense performance conditions. Staying true to MG's contemporary design language, the Cyberster's sleek aero tail not only enhances the car's aesthetic appeal but also boosts high-speed stability and reduces drag. At the back, the Union Jack-inspired taillights make this sportscar unmistakably British and instantly recognizable from afar. In essence, the Cyberster masterfully merges timeless design with cutting-edge technology, creating a thrilling driving experience like no other.

Luxury At Every Turn

Inside the MG Cyberster, everything revolves around the driver. A triple-screen setup is designed for a dynamic and intuitive experience, featuring two sleek touchscreens flanking a central hub. The central 10.25-inch instrument cluster screen display delivers essential information at-a-glance, showcasing speed, range, and navigation details with clarity and precision. Meanwhile, the right-hand screen brings the road to life, relaying images from the car's cameras to keep you aware of your surroundings. Additional buttons on the steering wheel that enables drivers to cycle through menus, ensuring every control is within reach.

As soon as you enter the MG Cyberster, you will be filled with an exciting sensation that you're driving a unique sports car. Step into a realm of performance luxury, with meticulously crafted Alcantara racing style seats that offer both ergonomic support and ample legroom for drivers of all sizes. Both driver and passenger enjoy electric adjustable seating with added lumbar support plus heating. Whether you're embarking on a long road trip or a quick city cruise, the seats can be tailored to your ideal position, providing an inviting and supportive environment. This attention to comfort reflects the Cyberster's commitment to elevating the driving experience for everyone on board.

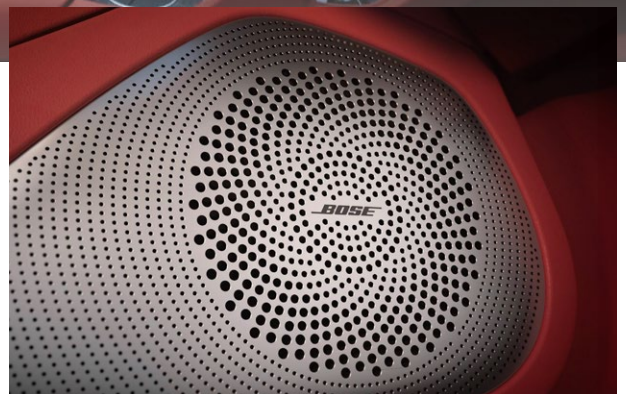
Infotainment plays a vital role in enhancing every journey, and the MG Cyberster ensures you stay connected and entertained with standard features like Apple CarPlay® and Android Auto™, all backed by an impressive 8-speaker Bose audio system that brings your favorite tracks to life with remarkable clarity and depth. Whether you're cruising along scenic routes or navigating busy city streets, the immersive sound experience transforms your drive into a soundtrack of excitement, making each trip not just a journey, but an unforgettable adventure filled with your favorite music and seamless connectivity. Attention to detail is paramount in crafting the driver's experience, merging high-tech features, premium comfort, and vibrant entertainment to forge an exhilarating adventure that reinvents what a contemporary sports car can achieve, and the MG Cyberster is just that and much, much more.



Harmonious Performance Meets Electric Power

Reaching your destination is just half the fun, and the MG Cyberster promises to deliver cheeky grins every time you put the foot down. At the heart of the Cyberster is a 77kWh battery, generating a combined max power of 375kW and a combined 725Nm of torque. This exhilarating performance propels the roadster from 0-100km/hr in just 3.2 seconds, a truly astonishing feat. This power then can be converted, thanks to the Cyberster's adaptable synchronous electric motor, providing high torque at lower speeds, making it an ideal urban drive. Coupled with the fact the Cyberster is an All-Wheel Drive roadster, the electric motor delivers seamless power to each wheel, enhancing acceleration but also allowing for agile maneuverability.

Fitted with 20" Spiral galaxy designed alloy wheels, high performance EV tyres and Brembo brake callipers, Cyberster guarantees superb grip around corners, enhancing stability and control even at high speeds. This is particularly vital when engaging the Launch Control feature, which allows for lightning-fast acceleration while maintaining control. For performance aficionados who desire a car that's not only quick but also efficient, the Cyberster stands out as a remarkable choice, expertly merging thrilling speed with advanced technology for consistent unforgettable moments behind the wheel.

Electric power meets convenience in the Cyberster. With a maximum DC charging power of 144kW the Cyberster ensures that downtime is minimal. A charge from 10-80% can be achieved in only 40 minutes when using a 150kW DC station. A blend of efficiency and performance is perfect for today's driver, making electric mobility both practical and exhilarating.

Advanced Safety, Enhanced Driving

We know when it comes to picking the right car for the family, safety is of the utmost importance and the all-new MG Cyberster has been designed with exactly that in mind. Engineered with cutting-edge safety technologies, the MG Cyberster offers protection for you and your loved ones.

Its advanced PILOT Safety suite features are all meticulously designed to enhance your safety on every journey. Beyond its superior safety performance, the MG Cyberster combines premium driving and comfort with the highest standards of safety, ensuring you can drive with complete confidence and peace of mind.

PILOT
DRIVER SAFETY TECHNOLOGY

INTELLIGENT SPEED LIMIT ASSIST

Actively detects speed limit signs and alerts you to your current vehicle speed.

AUTONOMOUS EMERGENCY BREAKING

AEB maintains continuously monitors the road ahead, autonomously engaging the brakes should it detect any obstacles posing a potential threat to the driver.

LANE KEEP ASSIST

Alerts the driver when the MG Cyberster is getting too close to the lane edge.

INTELLIGENT CRUISE ASSIST

Autonomously tracks the vehicle ahead, managing acceleration, braking, and steering to remain within the lane at cruise speed.

ADAPTIVE CRUISE CONTROL

Detects the front vehicle position and keeps a safe distance between your MG Cyberster and the car in front.

LANE CHANGE ASSIST

Alerts the driver when the MG Cyberster is approaching the lane edge too closely.

REAR CROSS TRAFFIC ALERT

Alerts you of approaching vehicles and pedestrians when reversing out of parking spaces.
